OBJECTIVES

A Highly motivated and skilled professional with a strong interest in Full-Stack Web Development within the field of Web Development. Proficient in HTML, CSS, Python Programming Language, and shell scripting, with intermediate skills in JavaScript. Experienced in graphics, product design and UI/UX. Adept at building websites (both back-end and front-end), designing different frameworks with the use of Figma, designing product packages and pop art. Strong problem-solving and analytical skills combined with a creative mindset. Committed to continuous learning and staying updated with the latest advancements in the field. Seeking a challenging role where I can leverage my diverse skill set to contribute to innovative projects in Web development and other fields.

EDUCATION CAREER

Bachelor of Science (BSc) in Software
Engineering

January 2023-Present

African Leadership University, Kigali, Rwanda

Short Bio

A dedicated student at the African Leadership University pursuing a degree in Software Engineering with a planned specialization in Full Stack Web Development. Committed to academic excellence, and personal growth, actively engaging in coursework, volunteer work, and practical projects to develop a strong foundation in both theoretical concepts and practical application. Continuously expanding knowledge, and leveraging skills to contribute to the field of Full Stack Web Development and drive innovation.

PROJECTS

Business Website

September 2021 – October 2022

- Developed a Business Web Application using WordPress that had shopping icon, search, sales and a lot more user interactions.

Portfolio Website

October 2021 – November 2022

- Developed a Portfolio Website of myself showcasing my basic skills of HTML and CSS without the use of Content Management System or Front-End framework/libraries. The link to the project:

Business Website

November 2021 – January 2021

- Developed and designed a Business website with the use of HTML5 and CSS. Designing the home page, about page, contact page, services page and made the website responsive. This had to be done in order for me to obtain my certificate. The link to the project: [Business Website](#)

Board Game Adventure

July 2022 – September 2022

- With the use of Python Programming Language, a group of five inclusive of myself built a board game adventure, an interactive game that tells the user to make a name for himself and go through a series of adventure. This is a link to the project: [Board Game Adventure Link](#)

Bank App

July 2022 - August 2022

- With the use of Python Programming Language, a group of five inclusive of myself built a bank app that gets a user's information and stores it into a database and helps form the user's information into the card. This is a link to the project: [Bank App Link](#)

Guessing Game

July 2023

- In order for me to get my backend development certificate, I had to create a python based development, whether an app or a game, as long as it was used with python and VSCODE, I would get my certificate. This is the link to my project: [Guessing Game Link](#)

Flyer (Portrait)

August 2023

- Designed a flyer from scratch for **ENIBOLA ENTERPRISES Laundry**, Magboro. A startup business planning on advertising for more customers to help bring income for their startup business. This is the link to the image:

Business Card

August 2023

- Designed a business card for ENIBOLA ENTERPRISES Laundry located in Magboro. A startup business planning on advertising for more customers to help bring income for their startup business.

Tourist Guide App

August 2023

- As a final project as a student of ALU, eight people inclusive of me, were all assembled as programmers who have the affinity to improve tourism in Africa. We decided to build a website using Python programming language, HTML and MySQL database to store information for the user/foreigners. This is a link to the website: [Travel app](#)
